

Summary

Platform engineer with deep experience in Kubernetes, container security, and cloud-native architecture. Skilled at guiding technical teams through proof-of-concept evaluations, architectural design, and secure platform adoption. Adept at communicating complex systems clearly to both technical and non-technical stakeholders. Passionate about improving software supply chain security, developer experience, and LLM capability through automation, observability, and open source collaboration.

Core Competencies

Kubernetes • Container Security • Cloud Architecture (AWS, Azure, GCP) • Software Supply Chain Security Architecture Evaluation • RFP/RFI Technical Support • Observability (OpenTelemetry) • Istio • DevSecOps • Terraform • CI/CD Design • Platform Engineering • Backstage • Open Source Collaboration • Effective LLM-driven Development • Customer Enablement

Certifications

- [Certified Kubernetes Administrator \(CKA\)](#)
- [Certified Kubernetes Security Specialist \(CKS\)](#)
- [Certified AWS Solutions Architect - Associate](#)

Professional Experience

Bridgephase

Arlington, VA (Remote)

Senior DevSecOps Engineer

August 2024 - Present

- Led BridgePhase's centralized cluster management initiative for Platform One
- Maintainer on Big Bang, open-source Air Force initiative delivering secure-by-default Kubernetes environments for software development and deployment
- Worked closely with government stakeholders to align Big Bang operational defaults to ATO and cATO requirements
- Ideated, initiated, and executed [comprehensive refactor](#) to align application deployment architectures across Big Bang projects to better serve the needs of Big Bang consumers and USAF stakeholders
- Created and maintained multiple Ironbank images for Big Bang components applications
- Led technical evaluations and architecture redesigns focused on service mesh and observability components to strengthen compliance and reliability
- Partnered with federal stakeholders on technical responses to RFPs/RFIs and capability assessments.
- Authored and presented best-practice documentation and architectural guidance for service mesh adoption and configuration adopted across multiple partner organizations
- Drove adoption of OpenTelemetry-based observability standards on Big Bang, improving runtime visibility across mission systems for Big Bang consumers

First Orion

North Little Rock, AR

Software Engineer

January 2022 - August 2024

- Designed and implemented experimental cloud-native architectures and PoCs to evaluate emerging technologies for production readiness
- Produced detailed architecture diagrams, solution briefs, and internal demos for engineering and leadership audiences
- Built a CI/CD pipeline framework that doubled developer velocity while improving observability and deployment security
- Acted as a technical bridge between engineering, security, and infrastructure teams to align on scalable Kubernetes practices
- Championed containerization and modern DevOps tooling to streamline development workflows and reduce time-to-delivery

Dillard's, Inc

Little Rock, AR

System Administrator

April 2021 - January 2022

- Collaborated with platform and infrastructure teams to evaluate and implement OpenShift/Kubernetes adoption strategies
- Aligned operational practices to PCI-DSS compliance requirements
- Automated certificate provisioning and source control migrations to improve developer experience and system reliability
- Developed observability tooling and dashboards to demonstrate performance improvements to technical leadership

Love's Travel Stops and Country Stores

Various Locations in AR and OK

General Manager

Sept 2017 - April 2021

- Directed multi-department operations across retail, food service, and logistics with 25–50 employees.
- Served as primary point of contact for HR and business operations for entire facility, driving performance and customer satisfaction

US Army

Barling, AR

68W10 Combat Medic

Nov 2011 - Nov 2017 (Honorable Discharge)

- Led an ambulance squad responsible for operational readiness, compliance, and high-pressure decision-making.
- Maintained HIPAA compliance and medical reporting accuracy under strict regulatory environments.
- Built leadership and communication skills foundational for cross-functional technical collaboration.

Walmart Stores Inc.

Fort Smith, AR

Assistant Store Manager

Oct 2008 - Sept 2017

- Managed operational teams, merchandising, and budget execution for a high-volume retail location.
- Mentored department managers and developed strong interpersonal and leadership skills.

Education

University of Arkansas - Fort Smith

2008-2012
